App Innovation Technologies - Coimbatore

- **hummm | Shop & Split Payments**

Hummm is a BNPL service provider that is listed in Australian stock exchange. Our team developed an app for their customers in UK and Canada that helps them in the end-to-end journey with the onboarding, tracking of loan installments and finally the repayment of installments.

-> Developed the app from ground-up using MVP architecture.

-> Implemented an application form within the app that is entirely driven by backend

-> Integrated Google Pay, Samsung Pay push provisioning that lets customer to add their payment cards to their G-Pay and S-Pay wallets.

-> Implemented the CI-CD pipeline using Github -Actions and Microsoft App Center

-> Other integrations - Google Analytics, Stripe SDK, Firebase Authentication

-> Have used Mockito, Roboelectric framework for writing unit tests.

-> Currently In the process of migrating the app from MVP to MVVM with kotlin

Playstore rating - 3.4 Rating
