SathishKumar G

Product Developer

Phone: 8903794737

Email: gsathishit@gmail.com

Product developer having 5+ years of experience in Web Applications and Microservices. Interested in learning new technologies and solving real world problems. Looking for a challenging environment that would enable me to expand my horizons and in turn help in achieving the goal of the organization.

WORK EXPERIENCE

Altimetrik India Pvt Ltd, Chennai.   November 2019 - till now
- **(Vendor in Ford Motors Pvt Ltd, Chennai)**

- Worked as an application developer in Webvmacs Application, which deals with Vehicle Monitoring and Control Systems.
- Involved in the development of backend RESTful services for Webvmacs Application and released the services on time.
- Analyzed and migrated the mainframe jobs into RESTful services and deployed in Pivotal Cloud Foundry.
- Identified the parts in existing Webvmacs application which is running as Monolithic Architecture, analyzed and migrated the business logic into a separate Microservice.
- Followed Test Driven Development(TDD) approach to ensure all the scenarios are covered in Junit test cases.
- Followed Agile methodology in the development process.
- Configured and integrated the Jenkins with Webvmacs application and automated the deployment process. Created Jenkins Pipeline and triggered the specific pipeline from remote service based on GitHub Webhook.
- Worked with different teams across FORD for Integration Testing and end user Acceptance Testing.
- Organized the weekly meeting with the Product owner and actively involved in the discussions related to the project and proposed solutions.
- Reviewing of code by team mates in each pull request to ensure code quality is met.
- Involved in the Production support of Webvmacs Application and managed to fix the issues within shorter period.

IVTL Infoview Technologies Pvt Ltd, Chennai.   June 2016 – October 2019

- Worked as an application developer in web application based ERP product that incorporates the functions necessary for Accounts and Human Resources Management.
- Worked as a Catalogue in-charge in the above product development which has the key responsibility of analyzing the business requirements of the module, preparing the design document and manage the complete development of the module till it's delivery with customer.
- Involved in test case preparation and written Unit test cases for all the scenarios.
- Involved in continuous support to the customers through bug fixing of the released product.
- Worked on a conversion project where the existing desktop application is converted into a web application. Here the key responsibility is to fix the UI/UX Issues in a converted application, test them and report if any functionality defects persist in the application to the conversion tool team with proper root cause of the issue.

Sona College of Technology, Salem.   2012-2016
